ASSIGNMENT AGREEMENT

This agreement is made this 7th day of October, 2002, by and between JENNIFER PATTERSON, a United States citizen residing at 3230 Brunswick Avenue North, Minneapolis, MN 55422 (Patterson); and J2D LLC, a limited liability company of the State Of Minnesota, having a principal place of business at 3230 Brunswick Avenue North, Minneapolis, MN 55422 (J2D).

WHEREAS;

Patterson is the sole inventor of subject matter claimed and described in U.S. Patent No. 6,294,995 entitled "Anti-Theft Alarm for Portable Computer" issued September 25, 2001, and is the owner of said U.S. Patent No. 6,294,005 and of counterpart applications claiming and describing said subject matter, including International Application No. PCT/US01/07432 (the International Application) and certain regional and national applications based on the International Application;

J2D desires to acquire said U.S. Patent and counterpart applications, any patents issued on the counterpart applications, any further applications describing and claiming said subject matter, and any patents issued thereon;

Patterson is willing to assign such patents and applications to J2D under the terms and conditions of this Agreement.

NOW, THEREFORE, in consideration of the mutual covenants and obligations hereinafter set forth, the parties agree as follows:

1. Definitions

- A. Applications mean any and all regional and national applications filed before the Effective Date to effect entry into the regional or national phase based on said International Application No. PCT/US01/07432, as identified in Exhibit 1 of this Agreement; and any continuations or divisionals of said regional and national applications.
- B. Patents mean U.S. Patent No. 6,294,995 issued September 25, 2001, and any and all regional and national patents issued on said Applications on or before the Effective Date.
- C. Future Applications mean any and all regional and national applications filed after the Effective Date to effect entry into the regional or national phase based on said International Application No. PCT/US01/07432, and any continuations

or divisionals thereof.

D. Future Patents mean any reissues of U.S. Patent No. 6,294,995, any and all divisionals or continuations of U.S. Patent No. 6,294,995, and any and all regional and national patents issued on the Applications or the Future Applications after the Effective Date.

E. Alarm Function means a capability to generate an audible or otherwise sensible alarm in response to an unauthorized closure of the cover of a portable computer or other unauthorized tampering with the portable computer, the alarm being generated in a manner within the scope of one or more of the Patents or Future Patents.

F. Products mean portable computers equipped or configured with an Alarm Function, and devices or components adapted for installation in a portable computer to equip or configure the portable computer with an alarm Function.

G. Methods mean steps or series of steps undertaken to equip or configure a portable computer with an Alarm Function.

H. Licensing Income means all revenue paid to J2D by licensees under any of the Applications, Patents, Future Applications or Future Patents, whether in the form of lump sum payments, ongoing royalties, or otherwise.

2. Transfer of Patents and Applications

2.1 Subject to the terms of this Agreement, Patterson hereby assigns to J2D the entire right, title and interest in and to U.S. Patent No. 6,294,995 and International Application No. PCT/US01/07432, the Applications, and the Patents.

2.2 Subject to the terms of this Agreement, Patterson agrees to assign to J2D the entire right, title and interest in and to any and all Future Applications and Future Patents.

2.3 With respect to the assignments contemplated under Sections 2.1 and 2.2, Patterson agrees to execute all papers, assignments or other documents as

requested by J2D, and in general will cooperate fully with J2D or its successors and assigns in the endeavor to secure, perfect, maintain or enforce any rights under said Applications, Patents, Future Applications and Future Patents.

2.4 J2D agrees that any Products sold or otherwise distributed shall be marked to identify any Patent or Future Patent in force in the jurisdiction within which the products are distributed. J2D agrees to require its licensees likewise to mark products sold or otherwise distributed by or for them.

3. Payments and Records

3.1 In consideration of the assignment under Section 2.1 and the agreement to assign under Section 2.2, J2D agrees to make the following payments to Patterson:

- a. Ten annual installments of \$4,000.00 each, the first installment payable on or before the first anniversary of the Effective Date, and subsequent installments payable on or before successive anniversaries of the Effective Date; and
- b. A payment of five percent (5%) of all Licensing Income received during each calendar year during the Agreement term, each payment being due two months after the preceding calendar year.
- c. J2D agrees to keep accurate records in sufficient detail to enable a determination of the payments due under Section 3.1(b), and to permit examination of these records by Patterson or an accountant of Patterson's choosing and at Patterson's expense.

4. Term and Termination

4.1 This Agreement, unless terminated earlier, shall remain in force until the expiration date of the last of the Patents and Future Patents to expire.

A. Patterson shall have the right to terminate this agreement:

- a. Immediately if J2D files, or has filed against it, any petition as to its bankruptcy

or insolvency, is declared bankrupt, becomes insolvent, makes an assignment for the benefit of creditors, enters into a voluntary or involuntary liquidation or receivership or otherwise loses legal control of its business involuntarily;
or

- b. In the event of material breach of the Agreement by J2D, and the failure of J2D to cure the breach within thirty (30) days after receipt of written notice of the breach from Patterson

4.3 This Agreement may be terminated at any time by mutual agreement of the parties.

5. Effect of Termination

- A. Upon termination of this Agreement pursuant to Section 4.2 or 4.3, ownership of the Applications, Patents, Future Applications and Future Patents shall revert to Patterson.

5.2 The rights and obligations of any licensees of J2D under any of the Applications, Patents, Future Applications and Future Patents shall survive the termination of this Agreement pursuant to Section 4.2 or 4.3. In this event, Patterson shall assume the obligations of J2D under such License agreements, and in return shall be entitled to the benefit of payments and other obligations of the licensees.

1. Confidentiality

- 0.1. The parties agree not to publicize the existence of this Agreement, and to maintain as confidential its terms and conditions.

1. Notice and Right to File Applications

- 0.1. Patterson disclaims any obligation or commitment to file any Future Applications.

- 0.1. Patterson agrees to provide to J2D, on or before February 3, 2003, a Notice Listing the regions or countries in which she intends to file Future

Applications, it being recognized that the deadline for filing Future Applications is April 3, 2003. If there are no such regions or countries in which Patterson intends to file, the Notice shall so state.

- 0.1. J2D shall have the right to file, at its expense, Future Applications in all Regions and countries not listed in the Notice. Patterson agrees to cooperate with J2D in filing such Future Applications.

1. Warranties and Disclaimers

- 0.1. Patterson warrants that she has the right to make the assignment pursuant to Section 2.1. She has not executed any instrument or taken any action contrary to either the assignment or Section 2.1 or the agreement to assign pursuant to Section 2.2, nor will she do so in the future.

- 0.1. Patterson disclaims any warranty as to the validity of any of the Patents or Future Patents, any commitment to file or maintain any patent applications or to maintain any patents, or any obligation to sue third parties for alleged patent infringement.

1. General Provisions

- 0.1. This Agreement constitutes the entire understanding of the parties relative to Its subject matter, and supercedes any previous understandings or agreements, whether oral or in writing. This Agreement may be modified only by a written instrument signed by the parties.

- 0.1. This Agreement may not be assigned by either party without the prior written Consent of the other, except for an assignment along with the sale of substantially all of a party's business relating to the Products and Methods.

- 0.1. Any dispute arising under this Agreement shall be settled by arbitration in Accordance with the Patent Arbitration Rules of the American Arbitration Association before a single arbitrator selected in accordance with those rules.

- 0.1. Any notices or payments given or required under this Agreement shall be Considered properly made or sent when delivered by hand to the individual

identified below, or when deposited with the U.S. Postal Service as first class mail, postage prepaid, addressed as follows:

AMENDED ASSIGNMENT AGREEMENT

This amended agreement is made this 10th day of April, 2003, by and between JENNIFER PATTERSON, a United States citizen residing at 3230 Brunswick Avenue North, Minneapolis, Minnesota 55422 (Patterson) and J2D LLC, a limited liability company of the State of Minnesota, having a principal place of business at 3230 Brunswick Avenue North, Minneapolis, MN 55422 (J2D).

WHEREAS:

When the parties entered into the original Assignment Agreement of October 7, 2002, it was the intent of the parties to provide for J2D LLC to purchase U.S. Patent No. 6.294,995 and the International Patent Application No. PCT/USO1/07432, under terms and conditions set out at section 3 of the original Assignment Agreement, for what the parties in good faith believed was the cost basis of the United States patent and the international patent application: the sum of \$40,000.00, plus other good and valuable consideration; and

After October 7, 2002, the parties were informed by Patricia A. Gartner, CPA, who reviewed all of the relevant financial records and considered them in the light of generally accepted accounting principles, that the cost basis of the U.S. patent and international patent application was not \$40,000.00 but rather was \$25,000.00; and

The parties made a mutual mistake of fact when they valued the U.S. patent and international patent application at \$40,000.00 and want to amend the October 7, 2002 Assignment Agreement to conform to the cost basis figure determined by Patricia A. Gartner, CPA, to be \$25,000.

NOW, THEREFORE, in consideration of the mutual covenants and obligations hereinafter set forth, the parties agree as follows:

Section 3 a. is hereby amended

From: Ten annual installments of \$4,000.00 each the first installment payable on or before the first anniversary of the Effective Date, and

subsequent installments payable on or before successive anniversaries of the Effective Date

To: Ten annual installments of \$2,500.00 each, the first installment payable on or before the first anniversary of the Effective Date, and subsequent installments payable on or before successive anniversaries of the effective Date

IN WITNESS WHEREOF, the parties have executed this Amended Assignment Agreement.

DECLARATION

IN REISSUE APPLICATION

U.S. PATENT NO. : 6,294,995
ISSUE DATE : September 25, 2001
TITLE : ANTI-THEFT ALARM FOR PORTABLE COMPUTER
Attorney Docket No. : P456.12-0001

As a below named inventor, I declare that:

1. I am a citizen of United States, now residing at Crystal, Minnesota.
2. I believe that I am the original, first and sole inventor of the invention described and claimed in U.S. Patent No. 6,294,995, issued September 25, 2001, and in this reissue application. I believe that I am also the original, first and sole inventor of the invention described in provisional patent application No. 60/124,413 filed on March 15, 1999, which is incorporated by reference in U.S. Patent No. 6,294,995 and from which U.S. Patent No. 6,294,995 claims priority.
3. I have reviewed and understand the contents of the above identified specification, including the claims as amended by any amendment. I acknowledge the duty to disclose information which is known to me to be material to the patentability of this application in accordance with 37 C.F.R. 1.56.
4. I believe U.S. Patent No. 6,294,995 is partly inoperative by reason that I claimed less than I had a right to claim in the patent. Specifically, the scope of the claims originally filed were overly narrow and included elements that did not fully define the intended scope of the invention.
5. The following errors render U.S. Patent No. 6,294,995 at least partly inoperative by reason that I claimed less than I had a right to claim in the patent. At least one error on which this reissue is based is presented below.
 - a) Independent claim 1 (as originally filed and as issued in the patent) included the phrase "an interrupt vector" in the preamble, which may be interpreted to render the claim overly narrow.
 - b) Independent claim 1 (as originally filed and as issued in the patent) included the element "causing an interrupt to occur within said portable computer", which renders the claim overly narrow.

IN REISSUE APPLICATION

U.S. PATENT NO. : 6,294,995

Page 2 of 3

- c) Independent claim 1 (as originally filed and as issued in the patent) included the element "said interrupt causing branching control to a fixed address in said interrupt vector following said detecting", which renders the claim overly narrow.
- d) Independent claim 19 (as originally filed and as issued in the patent) included the elements "a status location indicating foldable closing of said cover against said body" and "an instruction segment" in the preamble, which may be interpreted to render the claim overly narrow.
- e) Independent claim 19 (as originally filed and as issued in the patent) included the element "polling said status location to detect said foldable closing of said cover against said main computer body", which renders the claim overly narrow.
- f) Independent claim 19 (as originally filed and as issued in the patent) included the element "said instruction segment generating said audible alarm", which renders the claim overly narrow.
- g) Each of dependent claims 3-18 and 21-26 (as originally filed and as issued in the patent) depended from the preceding dependent claim in sequence (e.g. claim 3 depends from claim 2; claim 4 depends from claim 3; claim 5 depends from claim 4; and so on), thereby rendering dependent claims 3-18 and 21-26 overly narrow.

6. All errors which are being corrected in the present reissue application up to the time of filing of this declaration arose without any deceptive intention on the part of the applicant.

7. The errors of the U.S. Patent No. 6,294,995 are being addressed with the addition of new claims 27-43, which are being added through a preliminary amendment, pursuant to M.P.E.P. §1.411 and 37 C.F.R. §1.173(b).

8. All statements made herein of my own knowledge are true and all statements made on information and belief are believed to be true; and further, these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under 18 U.S.C. 1001, and that such willful false statements may jeopardize the validity of this application or any patent issuing thereon.
